**INDIA'S FIRST SELF-ACTIVATED
FIRE-EXTINGUISHER**

WHAT IS F-PROTEKKT ?

F-Protekt is a revolutionary self-extinguishing device that works independently of a power supply. With a tube made of special polyamide material, F-Protekt can detect and douse the fire before it can spread further. In case of fire, as the temperature reaches a critical threshold of 80°C for server cabinets, control pannels, electrical distribution board etc. the tube bursts at the point of highest temperature, thus releasing the flame retardant inside onto the source of the fire.
